# ARTISTS' STRATEGIES IN PUBLIC SPACE

Artworks hit the street in a wide variety of ways. Artists harbour diverging intentions when they work in public space...

This symposium will offer a range of positions and possibilities by and for artists that enter the arena of the uninvited visitor. Artists will talk about the context their work has to deal with, the role they want it to play and the effect, if any, they want it to have. The issue is the theory of the practice of art in public, and by focussing on specific works the practice of this theory should become visible.

The following artists will present their work:

Dennis Adams  
Lara Almarcegui  
Jeanne van Heeswijk  
Hans van Houwelingen  
Architecture of Interaction  
Superflex  
Barbara Visser
