Watch: Research Symposium 2019/2020

Gerrit Rietveld Academie & Sandberg Instituut

The Research Fellowship is an initiative of the Sandberg Institute and Rietveld Academie to pursue different knowledge practices involving topics such as Artificial Intelligence, The City and New Materials. From both Rietveld and Sandberg, a few candidates are selected to research one of the topics and share their project with the students and the community. The Fellowship Symposium was an online event that took place on October 9th, where we witnessed presentations by the 2019/2020 Fellows: Hannes Grassegger with *Infosphere*, Elena Khurtova & Marie Ilse Bourlanges with *Pollinating Agents*, Habib William Kherbek with *Technofeudalism Rising*, Tom K Kemp with *After the Maestro*, Varia (Manetta Berends & Joana Chicau) with *Not for any**, Angie Keefer with *Version Space* and Hans Muller. The symposium was moderated by Michelle Kasprzak.

Watch the presentations via the following video or read more about the [2019/2020 Fellows](#) and [Fellowship programme](#).
